ABOUT ME

Information Technology student with a strong passion for software development, digital innovation, and cybersecurity. Founder of WaslDam, a social-impact platform aimed at connecting blood donors with people in need across Libya. Experienced in community engagement through volunteer work and youth initiatives, with a growing interest in using technology to address real-world challenges. Highly motivated to contribute to impactful projects, expand technical expertise, and participate in international programs that foster innovation, entrepreneurship, and digital transformation across the MENA region.

EDUCATION

Higher Institute of Science and Technology – Tarhuna
Bachelor in Information Technology

Current Level: 3rd Semester (Expected completion: upcoming 2 months of current phase)
